

## *ERP Module for New National Physician Payment Transparency Program*

**Module to assist QAD customers to successfully meet Federal compliance requirements.**

### **Module Rational**

Starting August 1st, 2013 applicable manufacturers of drugs, devices, biologicals, or medical supplies covered by Medicare, Medicaid or the Children's Health Insurance Program (CHIP) are required to log and report annually to the Secretary certain payments or transfers of value provided to physicians or teaching hospitals ("covered recipients"). In addition, applicable manufacturers and applicable group purchasing organizations (GPOs) are required to log and report annually certain physician ownership or investment interests. The Secretary is required to publish applicable manufacturers' and applicable GPOs' submitted payment and ownership information on a public website.

Strategic offers a QAD bolt-on application called the "Sunshine Act Compliance Module" to assist customers to meet these new Federal compliance requirements successfully. The application supports the specific data collection requirements mandated by the Federal government in the final rule – and can be implemented very quickly to allow compliance with needed deadlines in as little as a couple weeks. Compliance to individual state requirements are not included in the Sunshine Act Compliance module.

### **Key Capabilities**

- Maintenance screens for users to create the records subject to the federally mandated National Physician Payment Transparency Program.
- Import a CSV file from Concur or other source into the maintenance screen.
- Browse to review the payment records that have been recorded.
- Provide integration to the Supplier Invoice Create / Voucher Maintenance screen.
- Develop the required reports and data for electronic submittal.

### **Sunshine Act Compatibility**

- .NET UI 2.1 or later
- QAD 2008 EE or later
- QAD 2008 SE or later
- QAD 2007 or later (retrofitting to previous versions may be possible at additional cost, requires investigation on a case by case basis)

“Complying with these national disclosure requirements is a huge undertaking. Collecting the data and preparing to submit the reports is a painful process for many companies, we have proactively brought a solution for our QAD customers to deal with this requirement.”

- Doug Novak  
President & CEO  
Strategic Information Group

### Sunshine Act Consulting Services Include:

- Project Management
- Mapping Suppliers to NPI numbers.
- Historical Data Loading and Testing.
- Work Instruction Development.
- Assistance with submitting data to the CMS including resolving data entry errors and re-submitting the data.
